PROJECTS

HooBank - [(Github Link)](#)

- This is a responsive landing page for the bank named Hoobank that also deals with other aspects of finance. It is made using the concept of modern UI.
- Live Link: [HooBank Landing Page](#)
- This website is made using **React JS, Tailwind CSS**

RedStore - [(Github Link)](#)

- RedStore is an e-commerce website for all the sports enthusiasts out there who want a place to explore and try out sports wears.
- This website is made using **HTML, CSS, JavaScript**

Timeline Template - [(Github Link)](#)

- Made a timeline design template to fill in the details and the differentiator is the later information starts to appear along with the scrolling of the mouse.
- This website is made using **HTML, CSS, JavaScript**

CO-CURRICULAR ACTIVITIES

- Member at **Google Developer Student Club** - Dayananda Sagar Institutions
- **Hacktoberfest 2022:** pushed 4 pull requests during the whole event which included improving the user interface of the websites with proper colour theory along with making and improving the documentation part of the projects.
- **Kharagpur Winter of Code 2021:** pushed 2 pull requests to the projects, where I improved the interface and layout of the landing page and added more features like the 'About Us' page to explain what the site is about.
